Subject: Handling of FTTH based services by CFA verticals in all field units.

While reviewing the item no. 97.11 for in house wiring for FTTH Project, the Management Committee in its 97th meeting held on Friday, the 13th day of May, 2011 has reiterated that the FTTH based service is like broadband and therefore, this activity be handled by CFA Wing in all field units, as this is a similar data service business. Therefore, CFA vertical in all units shall handle this issue. The SDOs/JTOs/TTA level officers in field units dealing with data / broadband services be imparted training for wiring etc based upon the module finalized by T&D Circle so that in house capabilities are strengthened.
